SUMMARY

Full Stack Software Engineer experienced in building secure and scalable, production-grade **web applications** across **startup, freelance** and **open-source** environments. Strong foundation in **Data Structures, Algorithms** and **System Design**, with hands-on expertise in **architecting APIs, authentication systems, microservices, AI-powered workflows** and **cloud deployments**.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, SSR, CSR

Backend: Node.js, Express.js, Django, Flask, REST APIs, GraphQL, JWT, RBAC, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, Redis, Firebase, Supabase

Cloud and DevOps: AWS (EC2, S3, Lambda), Azure, Vercel, Docker, GitHub Actions, CI/CD, Nginx, Linux

AI/ML and LLM: Scikit-learn, Pandas, NumPy, Matplotlib, NLP, Computer Vision, LangChain, LangGraph, RAG, Vector Databases

Tools & Practices: Git, VS Code, Figma, Agile/Scrum, System Design, Code Reviews, API Security

EXPERIENCE

Web Development Intern — Geeks Kepler

Nov 2025 – Jan 2026

- Built **responsive, cross-browser** web interfaces using HTML, CSS, and JavaScript following modern **UI/UX** principles.
- Translated **UI** mockups into **modular, reusable** frontend components ensuring **performance** and **maintainability**.
- Collaborated in **Agile** workflows using **Git-based version control** and structured **PR** reviews.

Open-Source Developer — GoFr and GSSoC

Jun 2025 – Sep 2025

- Developed scalable **dashboard** features and secure JWT-based authentication workflows for **distributed web applications**.
- Contributed production-ready **backend APIs** through structured pull requests and **collaborative** code reviews.
- Improved system **performance, modularity, and documentation** across multiple open-source repositories.

Software Engineer — WeBuiltU

Jan 2025 – Jun 2025

- Led end-to-end development of a scalable **MERN platform** with secure JWT authentication and **role-based access control**.
- Implemented Docker-based CI/CD pipelines via **GitHub Actions**, reducing **release cycles** by **~40%**.
- Optimized **database queries** using **indexing** and **caching** strategies, reducing **API latency** by **~35%**.
- Owned feature **planning**, sprint execution and **technical decisions**, improving platform **performance** and **scalability**.

Full Stack Developer — Professional Freelancer

Jan 2024 – Dec 2024

- Delivered end-to-end **full-stack solutions** including secure Razorpay payment integration and **robust** authentication systems.
- Reduced **server load** by **~50%** through database indexing, caching strategies, and **optimized REST API** design.
- Managed cloud **deployment**, configuration, and ongoing **maintenance** ensuring **scalability, reliability, and performance**.

PROJECTS

Legal Mitra — AI-Powered Legal Assistance Platform

([GitHub](#) | [Live Demo](#))

Tech Stack: Nest.js, LangChain, Supabase, BullMQ, FastAPI, BERT, Blockchain

- Engineered an **AI-driven** legal platform for document **analysis** and contextual **query resolution** using retrieval-based **LLM workflows**.
- Designed scalable backend architecture enabling **real-time assistance** and **asynchronous processing**.

Event Pass — QR-Based Ticketing & Real-Time Entry System

([GitHub](#) | [Live Demo](#))

Tech Stack: React, Next.js, Node.js, Express.js, MongoDB, Vercel

- Led a 6-member team to build a scalable QR-based entry system handling **5,000+ attendees** during Smart India Hackathon.
- Designed **secure REST APIs** and real-time dashboards with **offline validation** support, reducing **check-in time** by **~30%**.

Project Bazaar — E-Commerce Platform with Secure Payments

([GitHub](#) | [Live Demo](#))

Tech Stack: React, Next.js, Node.js, Express.js, MongoDB, Razorpay

- Architected and deployed a production-grade platform capable of processing **6,000+ transactions** with **JWT** and **Razorpay**.
- Optimized backend APIs** with **database indexing** and **caching**, improving checkout performance and reducing **latency** by **~40%**.

EDUCATION

Bachelor of Technology (B. Tech) — Computer Science and Design

Oct 2023 – July 2027

Galgotias College of Engineering and Technology, Greater Noida, India

CGPA: 8.52/10

Relevant Coursework: DSA, DBMS, Operating System, Computer Networks, Cybersecurity, Data Analytics, Cloud Computing, AI/ML, UI/UX

ACHIEVEMENTS

- GATE CSIT 2026 Qualified
- LeetCode Knight (Top 3%) — Solved 200+ DSA problems
- Smart India Hackathon (SIH) Finalist — Led a 6-member team to build a system under 36 hours
- NDA Recommended Candidate — Cleared NDA Written & SSB with All-India Rank in final merit list

CERTIFICATIONS

- MongoDB Associate Database Administrator
- Oracle Cloud Infrastructure AI Foundations Associate
- ISO/IEC 27001 Information Security Associate
- ISO 20000 IT Service Management Associate
- Professional Diploma — Software Testing & QA
- Professional Diploma — Web3 & Blockchain
